# The perfect treatment of your drinking water for any kitchen

## EVOfilter plus

EVOfilter + EVOcharge

3,200 CHF

**Guaranteed best and most durable filtration on the market.**

### Benefits

- + Water flow of 0.8–1.1 liter per minute
- + 100% more cellular availability
- + Extra oxygen in the water
- + Fresh mountain spring taste

### Filtration of all foreign substances

- ✓ The only filter on the market that removes completely, not just reduces!
- ✓ Proven laboratory and test reports

## EVOfilter premium

EVOfilter + EVOcharge + EVObooster

4,200 CHF ~~4,600 CHF~~

The maximum water quality

The EVOfilter plus is also equipped with our hydrogen generator for an even healthier water.

### Additional benefits:

- + High hydrogen content
- + Proven high antioxidant effect
- + 130% more cellular availability
- + Boosts cognitive abilities
- + More than 1,200 studies worldwide

## Maintenance costs

- ✓ Filter replacement only after 10,000 liters (approx. 4-7 years)
- ✓ CHF 499 for the replacement Kit
- ✓ CHF 699 for the replacement Kit, including maintenance by Evodrop
- ✓ CHF 999 for the replacement Kit including maintenance by Evodrop and a 5-year warranty extension

## Installation costs

The installation is carried out by our qualified technician or by a specialized partner located near you for a flat fee of CHF 500 VAT included.

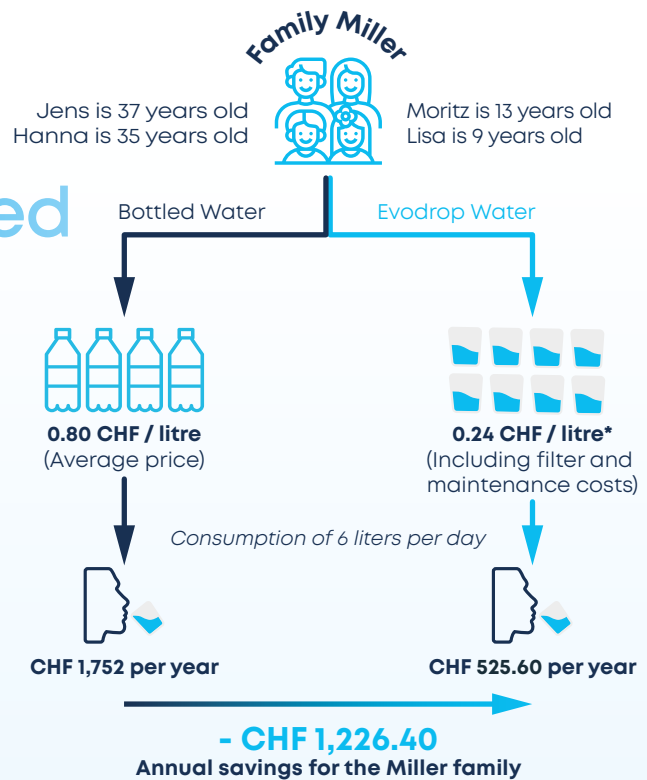

## Warranty

The manufacturer's warranty is of 5 years. In addition, a 30-day moneyback guarantee is granted on all systems.

# Save money with every liter consumed

In just under 3 years, the Miller family's entire filtration system has paid for itself in this example.

An investment in effective water treatment, which may seem expensive at first, always pays off in the long run, and not only from a health standpoint. The burden on the wallet is also significantly reduced.

## \*Evodrop water price per liter calculation

- Total cost over 10 years calculated on one day  
 $CHF\ 3,900 / (365\ days \times 10\ years) = CHF\ 1.15$
  - Maintenance costs (filter change every 5 years)  
per day  $CHF\ 499 / (365\ days \times 5\ years) = CHF\ 0.27$
  - Price per liter of tap water in Zurich per day  
 $(CHF\ 1.75 / 1,000\ liters) \times 6 = CHF\ 0.01$
- $(CHF\ 1.15 + CHF\ 0.27 + 0.01\ CHF) / 6\ liters = CHF\ 0.24$

As the total cost per liter pays for itself, the price per liter becomes more and more advantageous the longer we use our filtration system.

**SRCMB (Scientific Research Center of Medical Biophysics) of Dr. Ignatov.**

An extensive study has confirmed that the conductivity and solubility of the water is maximized by Evodrop, making it one of the best waters in the world.

**Dartsch Scientific is a renowned institute for cell biology in Germany.**

It is proven that water after treatment stimulates the basalcellular metabolism; thus cellular penetration and activity are boosted by 50% compared to untreated water.

**INTERLABOR BELP AG**

**Interlabor in Belp is a recognized water analysis laboratory in Switzerland.**

Thanks to the advanced analysis technology of the Interlaboratory in Belp, the permanent elimination of 614 foreign and polluting substances from the water was confirmed and proven.

**LifevisionLab**

**LifevisionLab, based in Switzerland, is a food quality research laboratory.**

Thanks to the Soyana method, the Swiss research laboratory was able to demonstrate the strong organizational power of water-treated with Evodrop compared to traditional tap water.

**IBBU**

**The IBBU is an institute for biosensory and bioenergetic research in Austria.**

It has been shown that the exchange of energy in water is optimal, which leads to the conclusion that the central nervous system is better stimulated by water.

**SWISS MADE **

**100% Swiss made, with a passion for engineering and high quality-materials**

Evodrop systems are developed and manufactured in Switzerland using patented technologies and high quality raw materials. We stand for this quality with the „Swiss Made“ label.

# EVOfilter

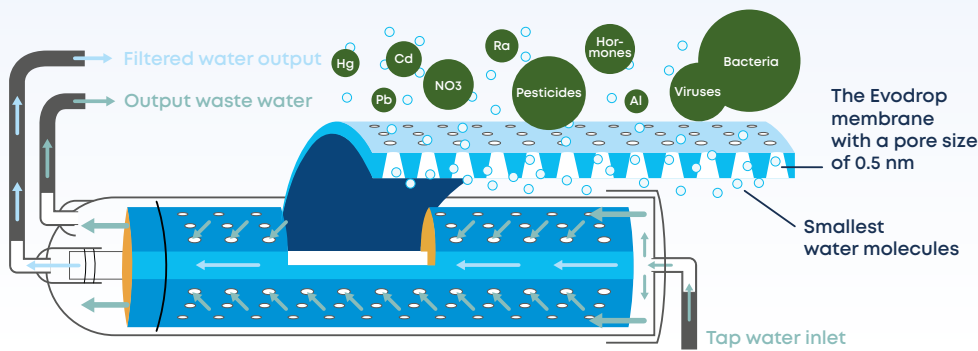

## The purest water thanks to the ultra-nano filtration

Thanks to its unique and patented ultra-nano membrane, the filter completely eliminates more than 614 harmful substances from the water on a scientifically proven basis.

Our ultra-nano filtration is based on a more efficient filtration process than traditional filtration methods. It is important to understand that essential trace elements are retained in the water. The water molecules are not altered compared to other filtration systems. The EVOfilter requires little maintenance and consumables and guarantees a constant quality of filtration throughout the life of the membranes.

The membrane has been patented and is unique on the market. Thanks to the certifications and test results, this filter is a safe installation for permanently very pure water.

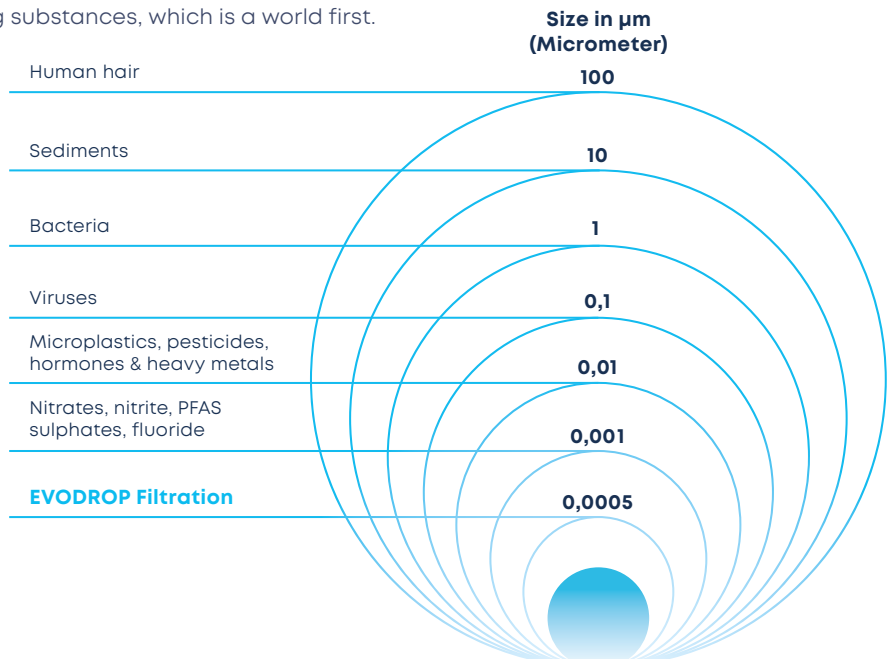

- + Reliable filtration of all pollutants
- + No more problems with limescale
- + Extremely long service life of 10,000 liters
- + Easy filter change thanks to bayonet lock
- + Various integrated control mechanisms

## No compromise on cleanliness

The EVOfilter has been tested by the Interlaboratory in Belp (CH), on 614 different foreign and contaminating substances, which is a world first.

- ✔ Medicine residues
- ✔ Hormonal Residues
- ✔ Bacteria and viruses
- ✔ Nitrates and nitrites
- ✔ Heavy metals
- ✔ Microplastics
- ✔ Glyphosate
- ✔ Antibiotics
- ✔ Hormones
- ✔ Fungicides
- ✔ Pesticides
- ✔ Herbicides
- ✔ Sulfates
- ✔ Fluoride
- ✔ ...and many more!

# EVOcharge

## Soft and healthy drinking water

The natural course of the spring water is simulated over 15 to 20 kilometers, which allows the water to bind with more oxygen. As a result, the water tastes softer and more digestible, as it does in natural springs where the water is constantly in motion.

Thanks to the strong dynamics of the current, the water gains in conductivity, solubility and natural vitality. This vibratory balance ensures an active exchange between the water molecules, and the cells of our body directly absorb the refined water. This makes water the most effective thirst quencher.

The patented algorithm and specially designed geometry of the EVOcharge rotates the incoming water at 2,000 rpm.

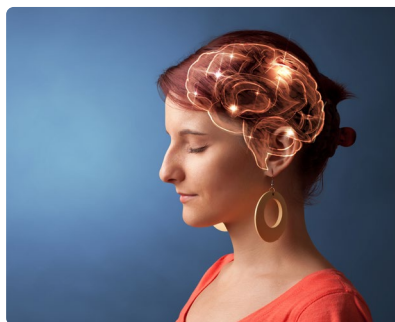

- + Patented rotation process
- + More oxygen in the water for a softer taste
- + Brings out all the flavors of coffee and tea
- + 100% increase in cellular water availability
- + Completely maintenance-free, thanks to a unique algorithm

### Better solubility

Solubility is one of the most important factors for water in our body. Water transports substances into our cells and enables cellular metabolism and detoxification.

### Maximum conductivity

All cognitive functions are conducted through water. This conductivity therefore interferes with all the electromagnetic impulses of our nervous system.

### Soft taste

Restructuring the molecular bonds of the water allows it to re-bind with more oxygen. The result is a soft and velvety flavor.

# EVObooster

## Hydrogen - the most powerful selective antioxidant

The EVObooster enriches water with molecular hydrogen. After treatment with EVObooster, a large amount of molecular hydrogen (H<sub>2</sub>) with high energy and antioxidant potential is available in the drinking water.

Hydrogen, being the smallest element in the periodic table, penetrates every cell and acts as a powerful, selective and natural antioxidant against oxygen free radicals in the body. Evodrop hydrogen-enriched water is extremely beneficial for a healthy body and mind.

about EVObooster

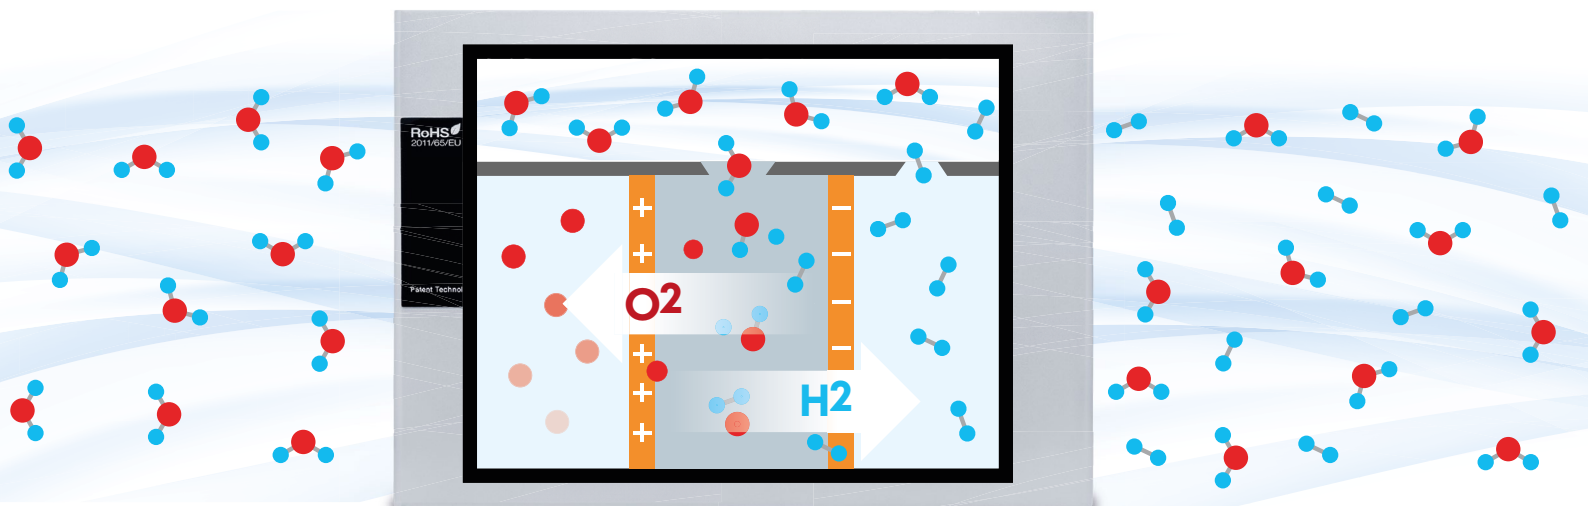

- + H<sub>2</sub> acts as a powerful selective antioxidant
- + Improves performance and regeneration
- + Boosts cognitive abilities
- + Promotes the production of H<sub>2</sub> by the body
- + Proven effectiveness in over 1,200 studies

### A surprising effect

The patented process separates hydrogen molecules from oxygen molecules and, unlike ionizers, the pH of the water is not altered. Pure molecular hydrogen is added to the water.

After drinking, hydrogen (H<sub>2</sub>) spreads in the body into the mitochondria of the cells, where energy is produced. There it can bind with harmful radicals. Due to the binding of hydrogen with the so-called hydroxyl radicals, it produces water again, which is simply eliminated from the body. Oxidative stress is thus reduced and a strong antioxidant effect results.

**The reduction of oxidative stress offers many advantages. Numerous studies show that hydrogen has a preventive effect on many disease symptoms and an anti-inflammatory effect, and it is also proven that regeneration occurred more quickly.**

# Carefree and healthy

## The cleanest water

Evodrop eliminates all harmful and foreign substances. This has been controlled and tested by accredited laboratories.

## Optimal health

The body is decongested and water can fulfill its function of dissolution, transport and detoxification.

## No more handling

Save time and energy by not having to carry around packs of water. The best water comes directly from the tap.

## No more limescale

As limescale is completely removed from the water, you increase the life of water-using appliances.

## Better sensation of thirst

Thanks to faster hydration, the sensation of thirst is better and it is easy to drink 2 liters of water per day.

## Full power

Studies show that Evodrop water boosts performance, fitness, recovery and health.

## A soft taste

The water has a light and soft flavor. It is not heavy and offers a beneficial refreshment.

## Environmentally friendly

A family of 4 saves up to 2,000 plastic bottles. The carbon footprint is reduced by about 0.6 tons per year.

30-day  
moneyback  
guarantee

5-year  
warranty

Possibility of pay-  
ment in installments  
up to 24 months

Full service -  
from advice to installation

## Evodrop is proud to have received numerous awards and honors.

### SEAL AWARD 2021

In late 2018 and 2021, Evodrop was awarded the SEAL Award for its sustainability and environmental initiatives and commitment to the environment.

### Prestige Award 2020

In 2020, Evodrop was pleased to receive the „Specialists in water filters of the Year!“ Award from the prestigious Switzerland Prestige Awards.

### BIZZ Award 2020

Evodrop won the BIZZ-Award for leading companies from different regions of the world.

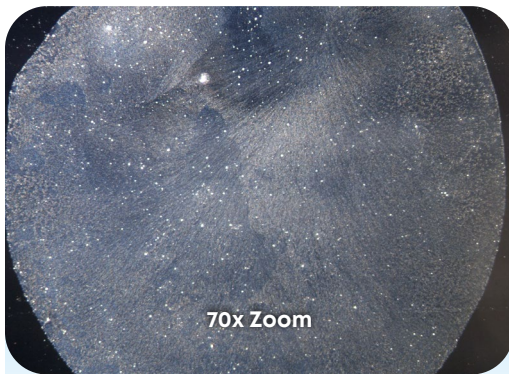

### Worldcob CSR 2020

Evodrop has been granted the „Worldcob CSR“ certification for its highly sustainable business concepts.

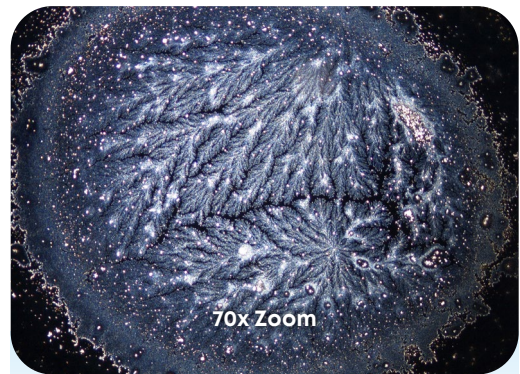

# True pleasure is in the water

**Without Evodrop**

Sample: tap water from Zurich Altstetten

**With Evodrop**

Sample: tap water from Zurich Altstetten

The crystallographic analysis of the LifevisionLab has demonstrated the strong organizational power of water molecules with our systems.

The study reveals, as shown in the pictures above, a clear improvement in water quality after treatment.

- ✓ Increased solubility and conductivity for a better flavor transmission.
- ✓ Improved bioavailability and cellular penetration.
- ✓ Increased water absorption capacity.
